

2 Metre Straight Plaster-in Aluminium LED Profile 55.5 × 13mm

Trimless plaster-in channel for LED strip up to 12mm, straight runs.

SPECIFICATION

Profile type	Straight plaster-in channel
Section	55.5mm flange · 15.1 × 13mm body
Length	2 metres
LED strip size	Up to 12mm (12.5mm channel)
Material	Anodised aluminium
Finish	Silver anodised
Diffuser	Opal, supplied
IP rating	IP20 — dry indoor only
Mounting	Plaster-in, recessed
Form	Straight runs only
Weight	520g
Guarantee	7 years

IN THE BOX

- 1 × 2m profile
- 1 × front cap
- 1 × 2m opal diffuser
- 1 × end cap

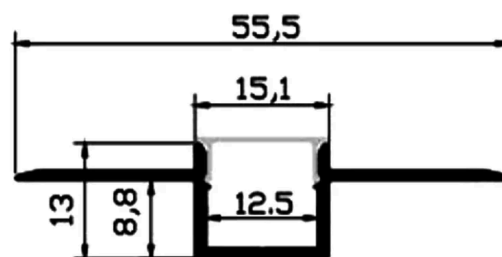

DESCRIPTION

A 2 metre plaster-in channel for LED strip up to 12mm wide, in a 55.5 × 13mm aluminium section with a 12.5mm channel 8.8mm deep. At 13mm high it needs only a shallow void behind the board, so it suits ceilings and walls where depth is tight.

Two of these cover a 4 metre ceiling with a single join; 1 metre lengths would need three. Fix to the framing before boarding, cut the board to butt the flange and skim across it so the light line reads as a slot in the plaster.

Fit the opal cover after plastering and decorating, never before: wet plaster dries hard in the retaining lips and the cover will not seat. IP20 rules out bathrooms and outdoor positions.

DIMENSIONS

Cross-section — all dimensions in millimetres
