Warranty	7 Years

DIMENSIONS

29.4mm = 2.94cm. Cut only at marked positions. Diagram not to scale.

SCOB means Special COB: 2835 LEDs beneath a continuous white emitting face. A fixed red colour for display features, entertainment spaces and decorative accents.

Red SCOB LED Strip

Colour, application and made-to-measure planning

SINGLE-COLOUR LIGHTING

Red ambient lighting

A fixed red colour for display features, entertainment spaces and decorative accents.

Illustrative indoor view. Screens, surfaces and surrounding light affect perceived colour.

Fixed colour – this strip does not change colour. CRI is not applicable to single-colour emission; it is a white-light colour-rendering measure.

INSTALLATION ESSENTIALS

Dry indoor use

For kitchen joinery, bedrooms, shelving and other dry indoor areas. IP20 is not waterproof; keep clear of water, steam and condensation.

Cut and mount

Disconnect power before cutting. Cut only at the marked 29.4mm (2.94cm) positions. Choose a compatible aluminium profile for support and heat management.

Power and control

Use a compatible 24V constant-voltage supply with adequate capacity and headroom. Dimming requires a matched single-colour controller or driver.

Plan longer projects

Maximum continuous run: 10m. Use separately powered runs for larger layouts. Confirm wiring and driver arrangements before installation.

BESPOKE LIGHTING FOR UK PROJECTS

ATOM LED provides bespoke, custom-cut lighting for UK homes and trade. Send your required lengths for cutting at valid marks within this product's limits.
