IP rating	See product page
Mounting	Recessed or surface
Form	Flexible — horizontal bend on site
Weight	Approx. 252g per metre
Guarantee	7 years

IN THE BOX

- 1 × diffuser body
- No strip included

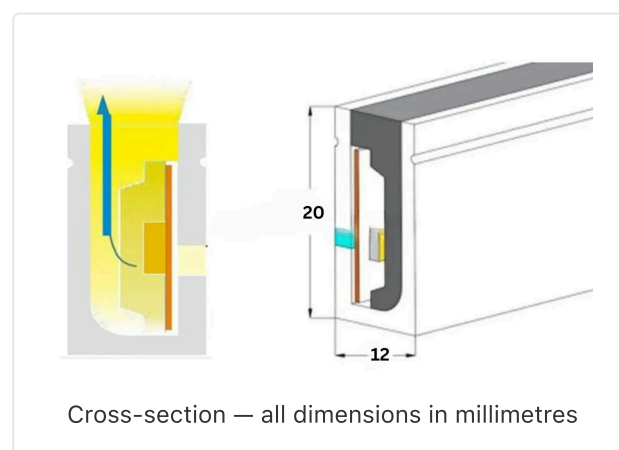

DESCRIPTION

A closed 12 × 20mm flexible silicone tube for 8–10mm LED strip. The strip is pulled in from one end and sits in a side slot facing across the body, so the 12mm top face lights as one even, dot-free line with no diodes showing.

Fix it with mounting clips screwed to the surface, or recess it into a groove, and glue end caps on once the strip is in. It bends horizontally on site to follow curves and cuts to length with a sharp blade.

No IP rating is published for this body, so treat it as a diffuser rather than a seal and check the product page before any damp position. Sold per metre from 1 to 50 metres.
