

Silicone LED Neon Flex Diffuser Body for LED Strip 16 × 16mm

Flexible opal silicone cover for LED strip up to 10mm, supplied by the metre.

SPECIFICATION

Profile type	Flexible silicone cover
Section	16 × 16mm
Length	1–50 metres, per metre
LED strip size	Up to 10mm
Material	Silicone
Finish	Opal
Diffuser	Integral opal silicone
IP rating	IP65 — surface splash only
Mounting	Clips or aluminium profile
Form	Flexible, top / vertical bend
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone body
- Strip not included

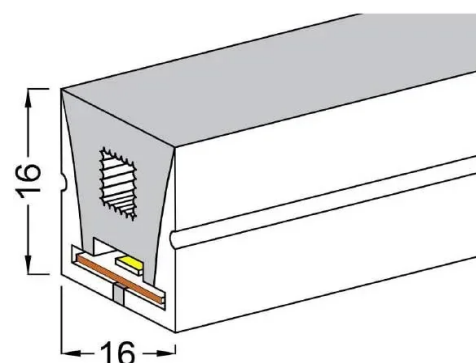

DESCRIPTION

This 16 × 16mm flexible silicone body turns a bare LED strip into a neon-style line of light. Feed strip up to 10mm wide into the channel along the base; the opal silicone above it softens the individual LEDs into a diffused, even glow.

Order the length you need from 1 to 50 metres. Fix it with clips, or sit it inside an aluminium profile for a straight recessed run. It bends top to bottom (a vertical bend), so it follows curves, lettering and stair outlines on site. No strip is included — this is the silicone housing only.

IP65 keeps splashes off the strip, but that is surface-splash protection only — keep it out of standing water and wet zones.

DIMENSIONS

Cross-section — all dimensions in millimetres
