Mounting	Recessed or surface
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone tube
- No strip supplied
- Length as ordered
- Sold by the metre

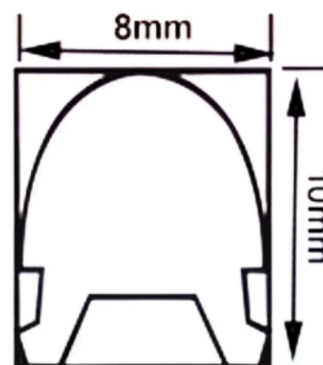

DESCRIPTION

This pink silicone tube is the diffuser body for a DIY neon sign: an 8 × 10mm section with a domed face and a slot underneath for LED strip up to 6mm wide. Push a 6mm single-colour strip in from below and the coloured silicone hides the individual LEDs, so the run reads as one continuous pink line.

It bends by hand on site to follow lettering and curves, and fixes recessed into a routed slot in the sign backing or surface-mounted. Order in whole metres from 1m to 50m; the LED strip is sold separately.

No IP rating is published and the strip channel is open underneath, so the tube adds no ingress protection of its own — keep it to dry indoor signage.

DIMENSIONS

Cross-section — all dimensions in millimetres
