IP rating	See product page
Mounting	Recessed or surface
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone tube
- Length as ordered
- Warm white, 8mm
- No strip included

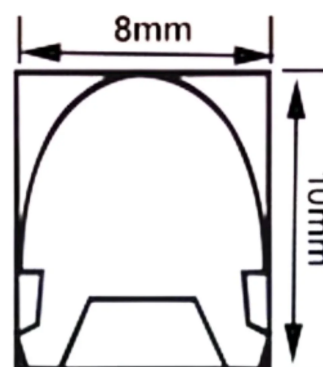

DESCRIPTION

This 8mm wide, 10mm deep warm white silicone tube slips over LED strip up to 6mm wide and turns it into one continuous neon line. The strip seats in the channel at the base and the domed top spreads the light so the individual LEDs disappear.

Fit it recessed in an 8mm routed slot or surface-fixed. It bends on site to follow lettering, logos and curved edges, which is why sign makers use it, and it is sold by the metre from 1m to 50m. The LED strip is bought separately — the warm white body tints the output, so check the strip colour you pair it with.

No IP rating is stated for this tube, so keep it to dry, indoor positions.

DIMENSIONS

Cross-section — all dimensions in millimetres
