IP rating	See product page
Mounting	Recessed or surface
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × yellow tube
- Strip not included

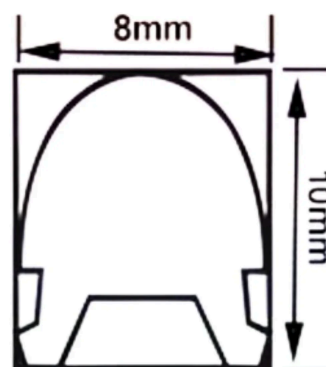

DESCRIPTION

An 8mm wide, 10mm deep flexible yellow silicone tube that slides over LED strip up to 6mm wide. The yellow body hides the individual diodes, so a plain 12V or 24V strip reads as one continuous neon-style line whether it is lit or off.

It bends on site around letters, logos and curves. Lay the strip on the backing first, solder the feed, then press the tube over it. Fix it to a surface or sit it in a routed slot for a recessed line.

The tube and the 6mm strip are sold separately, and the strip colour sets the lit colour. No IP rating is stated for this tube, so keep the strip and its joints dry and check the product page before any damp location.

DIMENSIONS

Cross-section — all dimensions in millimetres
