Diffuser	Integral opal silicone
IP rating	See product page
Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone cover
- Length as ordered

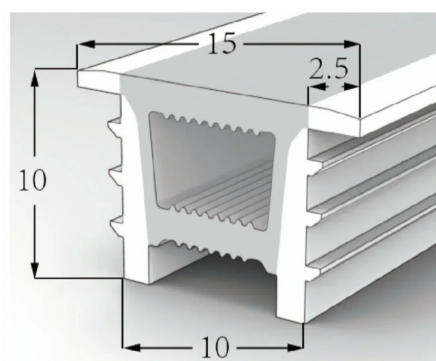

DESCRIPTION

A 10 × 10mm flexible silicone channel with a 15mm top flange, sized for LED strip up to 6mm wide. The strip sits in the lower slot and the opal body over it hides the diodes, so the run reads as one continuous neon-style line rather than a row of dots.

Recess it by cutting a 10mm groove — the 2.5mm lips each side cover the cut edge — or glue it to the surface where a groove is not possible. It bends to follow curves on site and cuts to length with a sharp blade.

Supplied in set lengths from 1 to 50 metres. No IP rating is published for this cover, so treat it as a dry-position product unless the product page says otherwise.

DIMENSIONS

Cross-section — all dimensions in millimetres
