Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone cover
- Strip not included
- Length as ordered
- Driver not included

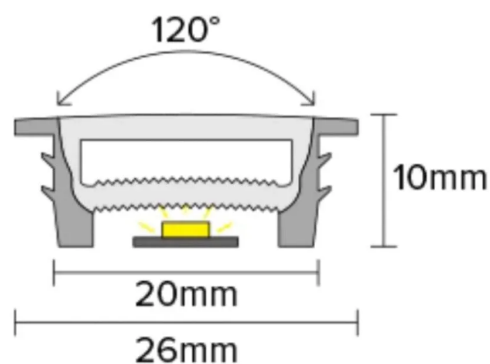

DESCRIPTION

A flexible silicone cover with a 20 × 10mm body under a 26mm top flange, sized for LED strip up to 10mm wide. The strip sits in the base of the 20mm channel and the opal top above it turns the separate diodes into one continuous line of light.

Rout a 20mm groove so the body drops in and the flange sits flat on the face, or stick it straight to the surface. Press the strip into the slot first, then fit the cover and hold it with adhesive or clips. The silicone bends on site around curves and corners and cuts to length where the run ends.

Sold by the metre from 1m to 50m. No IP rating is stated on the listing, so check the product page before fitting it anywhere damp.

DIMENSIONS

Cross-section — all dimensions in millimetres
