Diffuser	Integral diffusing top face
IP rating	See product page
Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × black profile
- Length as ordered

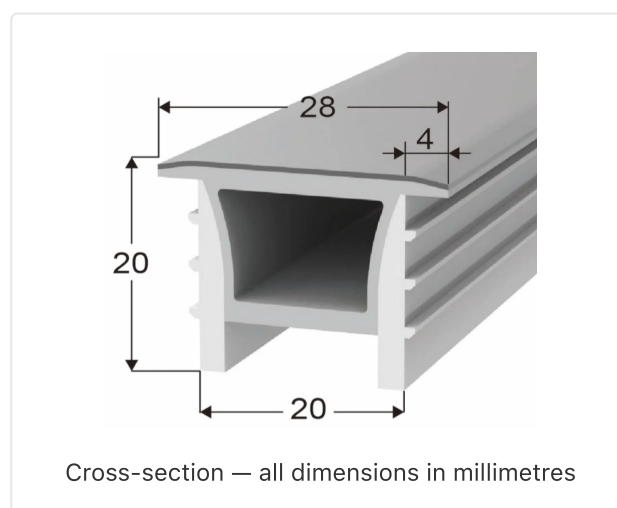

DESCRIPTION

A flexible black silicone profile with a 20 × 20mm body and a 28mm top flange, taking LED strip up to 12mm wide (8, 10 or 12mm). Feed a 12V or 24V DC strip down the channel and the diffusing top face turns it into a soft, neon-style line of light.

Fit it surface-mounted, or rout a 20mm slot and press the body in so the 28mm flange sits flat on the face and covers the cut edge. The silicone bends on site to follow curves and corners, and cuts to length with a sharp blade.

No IP rating is published for this cover, so treat it as a dry-location product unless the product page states otherwise. The UV-stable silicone holds its black colour over time.
