LED strip size	Up to 12mm (8, 10 or 12mm)
Material	Silicone
Finish	Opal
Diffuser	Integral opal silicone
IP rating	See product page
Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone cover

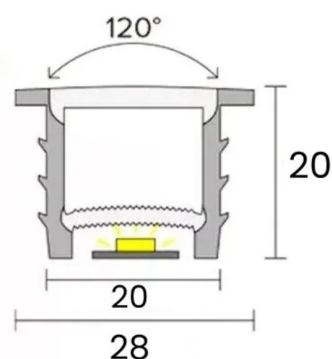

DESCRIPTION

A 20 × 20mm silicone body with a 28mm top flange: rout a 20mm groove and the 4mm lip each side hides the cut edge, or lay it flat on the surface. The channel takes 8, 10 or 12mm LED strip — stick the strip down in the groove first, then press the cover over it. It pushes in, or can be glued.

Being silicone rather than aluminium it follows curves on site — sweeps, corners and outlines — and trims to length with a sharp blade. Ordered in any length from 1 to 50 metres. The opal body hides the diodes and gives an even, neon-style line of light once lit.

No IP rating is stated on the listing, so check the product page before fitting it anywhere wet.

DIMENSIONS

Cross-section — all dimensions in millimetres
