Section	30 × 20mm body · 37mm flange
Length	1–50m, sold per metre
LED strip size	Up to 15mm
Material	UV-stable silicone
Finish	Black
Diffuser	Integral black silicone face
IP rating	See product page
Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone cover
- Length as ordered

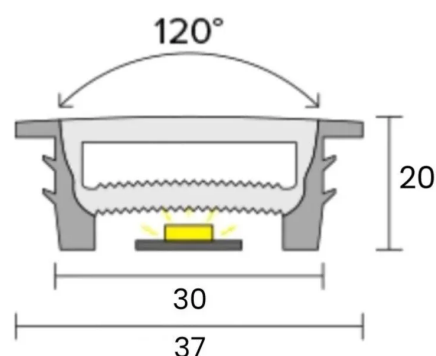

DESCRIPTION

This black silicone cover takes LED strip up to 15mm wide inside a 30 × 20mm body. The 37mm top flange overhangs 3.5mm each side, so it drops into a routed 30mm slot with the lip hiding the cut edge, or sits on the surface where you cannot recess.

Rout the slot, stick the strip to the base of the groove, then press the cover in. It reads as a black trim when off and as one diffused line when lit. The silicone bends on site to follow curves and cuts to length with a sharp blade.

No IP rating is stated on the product record, so check the product page before specifying it for a wet area. The silicone is UV-stable.

DIMENSIONS

Cross-section — all dimensions in millimetres
