Diffuser	Integral opal silicone · 120°
IP rating	See product page
Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Warranty	7 Years

IN THE BOX

- 1 × silicone channel
- Strip not included

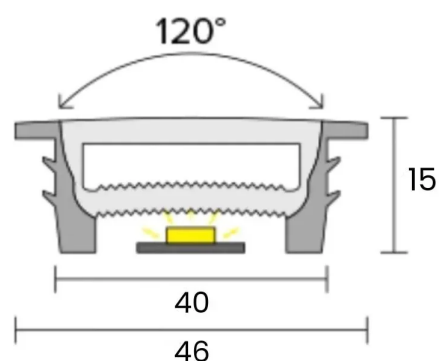

DESCRIPTION

A flexible silicone channel with a 40 × 15mm body under a 46mm top flange: rout a 40mm slot and the 3mm lips sit on the face, or lay it on the surface where routing is not an option. The 120° opal top hides the diodes and turns one strip up to 20mm wide, or two 10mm or 8mm strips side by side, into a single line of light.

Stick the strip to the channel floor, then press the silicone into the groove. It follows curves on site without tooling, cuts with a blade to suit, and is sold in lengths from 1 to 50 metres. Use 12V or 24V DC strip only.

No IP rating is published for this channel, so keep it to dry indoor positions unless the product page states otherwise.

DIMENSIONS

Cross-section — all dimensions in millimetres
