

Flexible Silicone Neon Cover for LED Strip, Curve Body 15 × 20mm

Flexible opal silicone cover for LED strip up to 10mm, fitted on the surface or recessed into a groove.

SPECIFICATION

Profile type	Flexible silicone cover, curve body
Section	15 × 20mm · 24mm full width
Length	Per metre, 1 to 50 metres
LED strip size	Up to 10mm (8–10mm strip)
Material	Silicone
Finish	Opal
Diffuser	Integral opal silicone
IP rating	See product page
Mounting	Surface or recessed
Form	Flexible — bends on site
Weight	See product page
Guarantee	3 years

IN THE BOX

- 1 × silicone cover
- Strip not included
- Length as ordered
- No fixings supplied

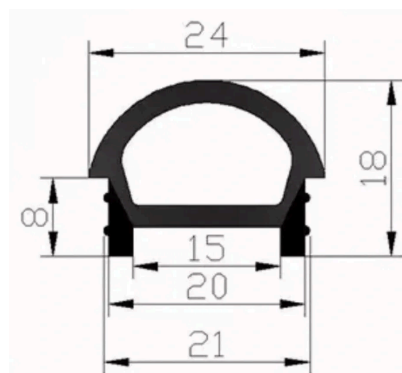

DESCRIPTION

This flexible silicone cover takes 8 to 10mm LED strip at 12V or 24V DC and turns it into a soft, dot-free neon line. The 15mm channel sits in a 20mm base under a 24mm domed top, 18mm high overall, so the dome reads as the light and the base sinks into the groove.

Rout a 20mm slot about 8mm deep and press the base in so the dome sits proud, or run it on the surface. Stick the strip in the channel first, then push the cover over it. It bends on site around worktops, stair strings and furniture.

Cut to length with a sharp knife; the silicone is UV-stable. No IP rating is published for this cover, so treat it as a diffuser, not a seal, and check the product page before any damp position.

DIMENSIONS

Cross-section — all dimensions in millimetres
